

The institution has established sustainable ecosystem. . Its aesthetic appeal and inspiring vibes empower the process of knowledge transfer while also fostering a positive attitude in learners. Various departments of our college take care of all the resources available and keep monitoring sound pollution, energy, water and proper utilization of wastes. To recycle organic waste we have composting in campus.

Our maximum classrooms have projector facility to broaden imagination and drill concepts to learner. To connect learner with nature, industry, market and society we conduct various visits to give them experiential learning.

We encourage student participation in beach clean-ups, skits, seminars, and workshops to foster a feeling of social responsibility and environmental awareness. We consistently participate in a variety of activities that shape learners into better citizens in order to raise learning standards beyond curriculum. To help learners develop a problem-solving mindset, we have arranged a number of workshops and other activities.

In addition to being a wealth of information, our well-equipped digital library's cozy AC reading room encourages students to study in comfort. To develop a good research environment we have research cell which nurtures the innovation amongst students also to disseminate the novelty college have its own journal.
