7.1.4 - Water conservation facilities available in the Institution

Maintenance of water bodies and distribution system in the campus

Maintenance of water bodies and distribution system in campus: Safe Drinking water hygiene and sanitation are crucial to human health and well-being. Drinking unsafe water impairs various health issues. For our college water bodies are nothing but the tanks. Cleaning of the tanks is done by the college management by the various detergents/chemicals (High strength Calcium Hydrochloride/ Bleach Solution) and hot water treatment to scrub and clean properly all internal surfaces of the tank. For this brush and high pressure Jet is used. Contamination (if any) and debris are also carried out. Water purifiers / water filters are also installed in the Office, Canteen and Staff Room and Library. Sign Boards have been displayed for economical use of water.
